WORK EXPERIENCE

Software Engineer

ISA Consulting [07/2024 – Current]

City: Remote

- Design and develop web applications using Ruby on Rails, React.js, and Next.js.
- Manage and implement databases, particularly with SQLite and SQL.
- Develop and implement new features, collaborating with product managers and stakeholders.
- Write unit tests, conduct automated/manual testing, and debug applications.
- Optimize performance, identifying and resolving bottlenecks.
- Integrate external APIs and web services.
- Maintain and create technical documentation, perform maintenance, and provide support.

Web developers

Ice Software [02/2024 – 06/2024]

City: Prishtina | Country: Kosovo

- Development and maintenance of scalable server-side applications using Node.js and Express.js frameworks.
- Collaborating with front-end teams to integrate RESTful APIs and GraphQL services for seamless application functionality.
- Implementing security measures such as authentication, authorization, and encryption to protect data integrity and confidentiality.
- Optimizing database performance through efficient query design and indexing strategies using MySQL or SQLite.
- Troubleshooting and resolving issues related to server crashes, slow response times, and other operational problems.
- Participating in code reviews and contributing to the development of clean, maintainable, and testable code.
- Assisting in the setup and configuration of deployment pipelines using tools like Docker, Kubernetes, and Jenkins for smooth and automated deployments.

Senior Ruby on Rails Developer

Hybrid Valley [08/2023 – 01/2024]

- Designing and Developing Applications: Create, maintain, and enhance web applications using the Ruby on Rails framework.
- Database Management: Design, implement, and manage databases (typically using tools like PostgreSQL, MySQL) and database schemas within Rails applications.
- Feature Development and Implementation: Work closely with product managers and stakeholders to understand requirements and implement new features.
- Testing and Debugging: Write unit tests, conduct automated and manual testing, and debug code to ensure high-quality applications.
- Performance Optimization: Identify and address performance bottlenecks within the application, optimizing speed and scalability.
- API Integration: Integrate external APIs and web services into applications as required.
- Documentation and Maintenance: Create and maintain technical documentation, provide support, and perform maintenance tasks as needed.

Ruby on Rails Developer

BaseCode [03/2023 – 07/2023]

City: Prishtina | Country: Kosovo
